Diploma in Strategic Managing Financial E-Government

Quality Education:
Learning Today for a **Better Tomorrow.**

E-Government refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits can be less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions.

BASIC FEATURES OF PRESENT MODEL OF E-GOVERNANCE

- *Government is simple ; moral; transparent ; efficient.
- *Commodity to deliver is service but delivering agency is Government.
- *Legacy problems of existing Government is assumed to be resolved over Technology Backbone.
- *Basic orientation of this model is not to reduce the role of Government in Citizen's life but to serve it more efficiently.
